

1. Brainstorming & Ideation

Problem Statement

Millions of people in India struggle under the burden of loans and debt, but they:

- Don't know the right way to negotiate with their lender
- Have no knowledge of settlement strategies (Avalanche/Snowball methods)
- Lack the confidence to write a professional negotiation email
- Don't have a clear overview of their overall financial health

Idea

FinRelief AI — An AI-powered platform that helps borrowers understand their debt, negotiate with lenders, and systematically settle their outstanding loans.

Why This Idea

- A real-world problem faced by millions of Indians
- A meaningful use case for AI (Gemini) — not just a chatbot, but actionable financial guidance
- Technical depth: authentication, database design, AI integration, real EMI calculations
- Scalable: could be useful for banks/NBFCs in the future as well

Target Users

- Individuals struggling with loan repayment (personal loan, credit card, home loan, etc.)
- Users overdue on EMIs who need negotiation guidance
- Anyone wanting to understand debt payoff strategies (Avalanche/Snowball method)

Core Value Proposition

“Reduce the burden of your loan, intelligently.” AI-powered negotiation strategies that understand your financial situation and suggest the best way to talk to your lenders.
